

HG 700 + HG 600 'Hewitech-Hanging Grids'

The 'Hewitech-Hanging Grid' have been developed for counterflow and crossflow cooling towers - natural draft and field erected.

High strength grids ensure low pressure loss with minimised droplet emission.

Hanger allow different distances with easy + safe installations.

Hanging grid 705 x 705mm /610 x 610mm

Features and advantages:

- rigid and very heavy duty grids in PP
- meeting CTI STD 136
- maximum efficiency with minimum power requirements
- 'fire retardant' version available
- standard colour lack to dark gray
- antimicrobial version available
