

**Special additives create an 'acid'- surface at the plastic surface against bacterias (incl. legionellas)**

Main characteristics will not affected

**further advantages are:**

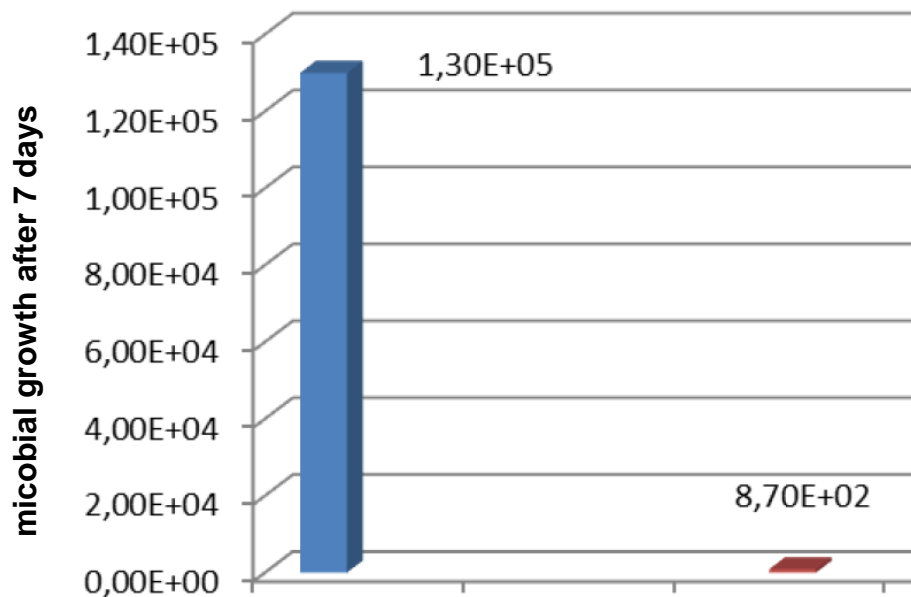

- Hewitech 'AM' : available in the main fills and droplet eliminators
- safe additives : environmental approved
- no HEMMHOF! , because of insoluble additives
- long lifetime , mixed in the raw material

International test-method: JIS - Z 2801

Bacterias reduced in the petri dishes during time

## Example for biological activity of plastics JIS -Z 2801

Hewitech – 20 years experience with welded PP film cooling fills
